ITMO Fellowship Program

For aspiring
researchers and academics

5 possible tracks for researchers within the program

Short-term cooperation

Visiting Lecturer → teaching

Micro Fellowship → collaborative research

Long-term employment (relocation to ITMO)

Postdoc → research + minor teaching duties

Fellowship → lead a research group + teach

Long-term cooperation (several visits per year)

Professorship → lead/create a lab + teach

Note: Only candidates **without prior employment history** at ITMO University are eligible for the Program

Visiting Lecturer

KPI	
Teach a course (3 ECTS)	
REMUNERATION	
Visit to ITMO	170 000 rub
	or 50 000 rub + expenses coverage (travel and accommodation)
Online	50 000 rub

COOPERATION CONDITIONS	
Required h-index	0+
Format of collaboration	Short visit or teach online
Duration of teaching	2-3 weeks
Repeated visits to ITMO	Once a semester (up to 4 semesters)

Micro Fellowship

KPI

Open lectures and consultations for students

Publication of a scientific article as a result of collaboration (high-ranking journals)

REMUNERATION

170 000 rub + expenses coverage
(travel and accommodation)

COOPERATION CONDITIONS

Required h-index

5+ **OR** at least 4 articles in journals Q1-Q2 in the last 2 years

Payment terms

After confirming the submission of the article for publication

Duration of visit to ITMO

1 month

Repeated visits

Only **one visit**
After successful completion, candidate can apply for long-term collaboration

Format of work

Only face-to-face
Short-term visit to ITMO

Postdoc

KPI per year

Active research on relevant topics

Publication of scientific articles (no less that 2)

Open lectures and seminars

REMUNERATION

116 500 rub per month

COOPERATION CONDITIONS

PhD	Awarded not more than 5 years ago
Required h-index	4+
Payment of the remuneration	Monthly
Duration of the contract	1 year (+2)
Format of work	Relocation to ITMO

Fellowship

KPI per year

Create and lead a scientific group

Represent ITMO at the conferences

Apply for the grants

Supervise the Master's thesis for (no less than 1)

Publish scientific articles (no less than 3)

Teach a course (3 ECTS)

REMUNERATION

200 000 rub per month

COOPERATION CONDITIONS

Required h-index

7+

Duration of the contract

1 year (+2)

Repeated visits

Extension of the contract for the second and third years is possible

Format of work

Relocation to ITMO

Professorship

ITMO

KPI per year

Create and lead a lab, scientific group

Represent ITMO at the conferences

Apply for the grants

Supervise the Master's thesis for (no less than 1)

Publish scientific articles (no less than 4)

Teach a course (3 ECTS)

REMUNERATION

100 000 rub per month

COOPERATION CONDITIONS

Required h-index

20+

Duration of the contract

1 year (+1)

Format of work

Presence at ITMO for 4 months in a year

How to apply for the Program

1. Choose **Track**

Depending on qualifications, desired work period and expected result ([tracks comparison](#))

2. Choose **Department**

Please have a look at the list of ITMO [departments](#), find a Unit relevant to your research area, and contact the head of this department to discuss the possibility of collaboration

3. Prepare **Proposal**

research tracks: Research Proposal should include the project's title, scope, and objectives; research plan (stages, presence in SPb, etc.); deliverables; budget

academic tracks: Syllabus should contain course title and abstract; scope, topics, duration, and preliminary dates, target audience, learning outcomes, structure, grading rules

4. Get **Letter** of Support

The letter is an official invitation to participate in the program from a Host Unit

5. **Apply** on the website

Fill out the online [Application form](#) and upload the following documents: PhD Diploma (or equivalent), CV, Research Syllabus, Letter of Support, Recommendation Letters (PDF files)

6. Wait for the **Results**

The meeting of the Program Committee is held every two months, you will be notified about the results by e-mail

Russian Science Foundation
2020 Performance Highlights

2021

Laying
Groundwork
For future

RSF
Russian Science
Foundation

Message from the Director General

Dear colleagues,

I am pleased to present to you the report on the Russian Science Foundation's performance results for 2021!

Last year was the Year of Science and Technology in Russia, and the RSF contributed a lot to the variety of events. Our grant recipients appeared all over the news and on our TV screens in 2021. They delivered lectures, visited schools, and opened their laboratories to everyone. It is thanks to all this that more eyes than ever were focused on the achievements of Russian science, and the profession of researcher has gained prestige once again.

The year will also be remembered for the work to optimize the activities of key development institutions initiated by the Government of the Russian Federation. New funding programs of the RSF were launched in a spirit of the programs used to be offered by the Russian Foundation for Basic Research such as grants for small research teams and for the projects that benefit respective Russian region. At the same time, the increased amount of the grants and the extended project implementation period allowed RSF grant holders to attend international conferences, to do expeditionary and field work, to gain access to unique research infrastructure, and to pay the costs of publication of research results, without having to seek additional funding.

Like everyone else, the Russian Science Foundation had to live under COVID-related restrictions in 2021. Some of our colleagues in overseas could not come to Russia to carry out joint research, some failed to complete all the tasks under the terms of the grants. We, of course, acknowledged the challenges experienced by grantees, and our reviewers evaluated the projects on a case-by-case basis during the reporting period. All scientific reports were submitted on time, and the research teams received their funding as scheduled. One of the most important decisions last year in terms of supporting scientists was to increase the size of RSF grants to 7 million roubles.

The well-coordinated work of the RSF team allowed us to achieve impressive results in a difficult time. In 2021, the Russian Science Foundation funded 5,300 projects that produced over 14,000 publications in leading scientific journals. The Foundation continued to improve its review processes through yearly rotation of the expert councils members and establishment of a new expert council responsible for regional funding programs.

In closing, I would like to express my gratitude to all the researchers who have demonstrated outstanding results in their work for the advancement of science, society and the economy, as well as to the RSF reviewers, colleagues and trustees. I am confident that we can achieve even greater results next year.

Alexander Khlunov,

Director General, Russian Science Foundation

About the Foundation

Russian Science Foundation was established on the initiative of the President of the Russian Federation to support basic research and development of leading research teams in different fields of science. Legal status, powers, functions, proprietary rights and governance of the Foundation are determined by the Federal Law «On the Russian Science Foundation and Amendments to Certain Legislative Acts of the Russian Federation.»

To achieve its goals, the Foundation selects science and technology programs and projects that fall under certain propriety categories, and does so on a competitive basis. Among these priorities are basic research initiatives by research groups or individual scientists, or members of the higher education teaching staff; development of scientific organizations and institutions of higher education, creation of world-class departments and laboratories in scientific organizations and educational institutions, development of experimental facilities for scientific research.

The governance structure of the Foundation is set up by the Federal Law: Supervisory Board, Management board and Director General. The Federal Law sets out a procedure for formation of these bodies as well as defines their authority. In order to provide the Foundation with the necessary expertise, the Federal law provides for creation of Review Panels acting as advisory bodies of the Foundation. Control over financial and economic activities of the Foundation is exercised by the Audit Committee of the Foundation. In accordance with the Federal Law, Russian Science Foundation submits the annual report for consideration of the President of the Russian Federation and the Government of the Russian Federation.
